

**Kansas #3 Summary of Services:**

We are certified organic farmers helping each other understand the challenges of growing crops and livestock in western Kansas. Our office is in Decatur County. Our contact person, Demetria, is a second-generation certified organic farmer, an inspector of more than 10 years, and served on the OCIA International Board of Directors for six years. She is our independent contractor who can confidentially give you advice (technical assistance) on certification issues. When you achieve organic certification, we add you to our LLC, which means you will need to provide information to our tax preparer and then you will be issued a K-1. We run a modest budget and host a networking and business meeting once a year, in person and online in a location central to our membership.

**Our fees starting in 2026 are \$50, due December 31 of each year.**
